PSYCHOPATHIC
MIND-CONTROLLING
MANIPULATORS?**

The psychological manipulation we experience throughout our lives is easy to miss until we start noticing it. Salespeople, institutions and the media use tactics that we've come to expect, but is there an even more sophisticated effort secretly conducted to condition our thinking and behavior? The evidence suggests there is, and that it's more pervasive and far-reaching than we realize.

Psychopaths are typically charismatic master-manipulators who crave power and act upon us without the limitations of conscience. If we can grasp the reality of psychopaths both in our lives and in positions of influence- we can protect ourselves from their insidious agendas. Join this panel of experts for a blinders-off, down-the-rabbit-hole exposé of psychopaths and their mind control programs, and its disturbing effects on our world and us.
